## Course Level Assessment Data Collection Process

1

### What is Course Level Assessment?

Course Level Assessment (CLA) is the process of our discipline assessing our outcomes from our courses. Outcomes listed on the syllabus from the **Official Course Outlines** are assessed to make sure our students are meeting the outcomes to our satisfaction and also that the outcomes are still relevant.

2

### Why is the work important?

We are collecting data to assess our course outcomes so that we can make data informed decisions. After the data is collected, we will convene as a discipline to **discuss the results** and drive collaborative conversations about teaching and learning.

3

### What do I need to do?

- We are collecting **data for the outcomes below**
- **This outcome is taught in a course or courses that you are teaching this year.**
- Once the **assignment that you are using to assess this outcome** in your course is complete, please **use the following link** to submit basic course information as well as **the results from your assignment:**  
<https://www.surveymonkey.com/r/YX2ZTH8you>

**That's it!** Once you have entered the data at the link above, your submission participation is complete. We will then meet as a discipline to discuss our data results.

### Course Outcomes to collect data on this year:

- **CRSE 1010**  
*Outcome: Describe Tri-C*
- **CRSE 1020**  
*Outcome: Explain STOMP's creation*
- **CRSE 2030**  
*Outcome: Research each Tri-C Campus*

**Please respond to this email with questions.**

**Thank you for your participation!**
