BLENDED-LEARNING

Blended-learning means that part of your training is done online and the other is done in-person at one of our Corporate College locations. The details of when the course starts online and when the in-person offerings are held are located under the course description. The online portion is done at your own pace, but we encourage you to have the specified modules done before you come to the in-person class since you will be reviewing those materials through examples, participant interaction and instructor led discussions.

VIRTUAL ONLINE

Virtual online means that the course will occur entirely online, but there will be mandatory sessions (either 1.5 or 2.5 hours in length) where you have to sit in front of your computer with a telephone and interact with class participants and the instructor. Those dates and times may vary, but are listed under each virtual online offering.

ONLINE

Online means that the course is held entirely online and is self-paced based on your learning style. Each course is given a start and end date. You just need to complete all requirements by the end date to obtain a certificate of completion.
