FirstEnergy (NYSE: FE) is a leading regional energy company dedicated to safety, reliability and operational excellence. Headquartered in Akron, Ohio, FirstEnergy includes one of the nation’s largest investor-owned electric systems and a diverse generating fleet.

FirstEnergy’s 10 regulated utility companies serve 6 million customers within a nearly 65,000-square-mile area of Ohio, Pennsylvania, Maryland, West Virginia, New Jersey and New York. Our transmission subsidiaries operate nearly 20,000 miles of high-voltage transmission lines connecting the Midwest and Mid-Atlantic regions. Our electric companies operate a vast infrastructure of more than 194,000 miles of distribution lines across our six-state service area.

Get ready for a career that reaches new heights

FirstEnergy’s Power Systems Institute
Established by FirstEnergy in 2000, the **Power Systems Institute (PSI)** is a unique, two-year program that combines classroom learning with hands-on training. Students who successfully complete the program earn an Associate of Technical Studies degree in **Electric Utility Technology** which can lead to a career as a lineman in the electric utility industry. **Tuition, required books and lab fees paid by FirstEnergy for qualified students.**

**Course Curriculum**
The curriculum at Cuyahoga Community College includes technical coursework (electrical circuits, mechanical/electrical print reading), technology labs and business-specific courses, in addition to the required general education courses such as English composition, algebra and science.

**Field Experience**
Following the second semester, qualified students are required to participate in a compensated, 10-week (40 hr/week) evaluated field experience. Work assignments begin in May and end in August. Pre-employment screening is required.

**Potential Employment**
While completion of the PSI program prepares you for a job in the electric utility industry, it does not guarantee a job offer from FirstEnergy. However, students with the right grades, skills and attitude will have the potential to be hired upon graduation by FirstEnergy, as the company determines its staffing needs.

**Steps in the Selection Process**

1. **Program Information Session**
   This is your opportunity to learn more about the program and decide if a career as a lineman is right for you.

2. **Technical Evaluation**
   Prospective students are evaluated on a series of hands-on activities that are performed on the job.

3. **Placement Testing**
   Academic readiness must be confirmed through placement testing and/or transcript review with the college.

4. **Background Screening**
   Prospective students must successfully pass a background screen consisting of criminal and driving history.

5. **Physical Capabilities Assessment**
   Strength and endurance is tested to ensure prospective students are right for this type of work.

6. **D.O.T. Physical**
   Prospective students must provide a completed Medical Examiners Certificate.

7. **Qualifying School**
   Prospective students are evaluated on their ability to perform the duties of a lineman for enrollment in the PSI program.

8. **Interview**
   Prospective students participate in an interview with FirstEnergy management.

9. **College Enrollment**
   Classes begin for selected students in the fall semester.
