

## TRI-C Adding Follett Tool/Pearson Course Materials - FALL 2026

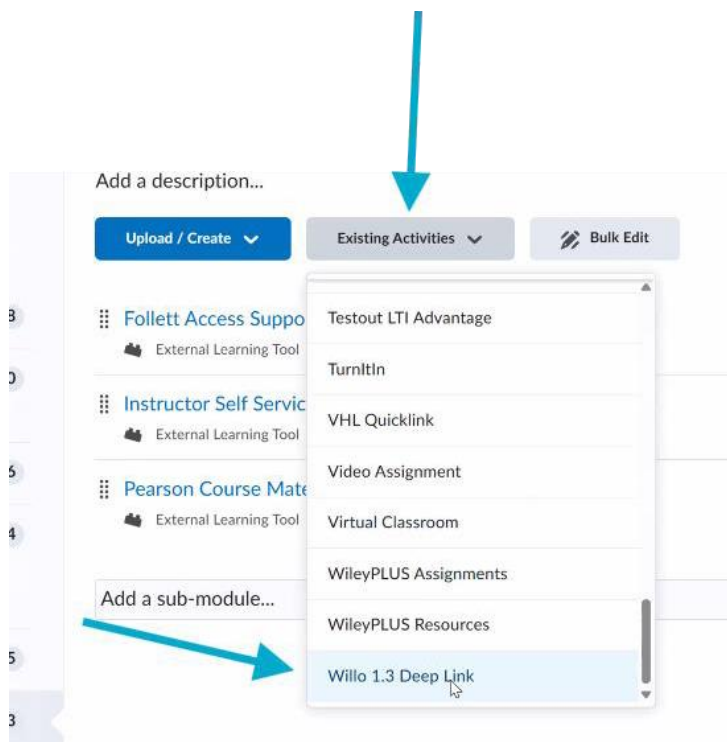

In D2L/Brightspace, go to **Content**:

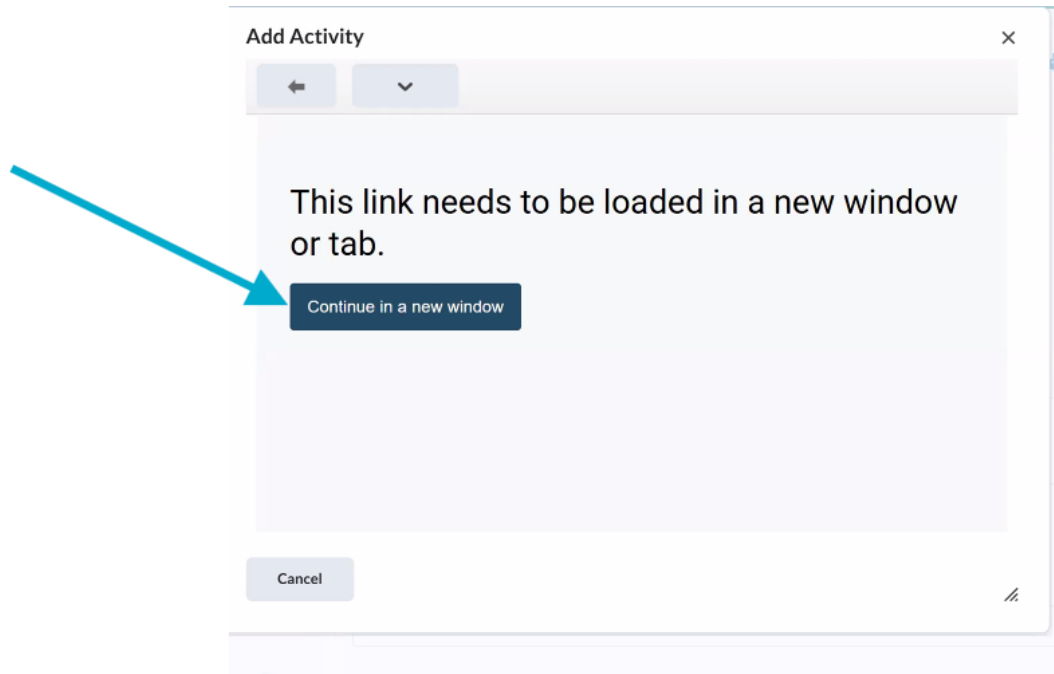

**Add a Module** (you may name this whatever you'd like, but you may want to consider naming it Pearson MyLab/Mastering):

Once you've created the Module, Click on **Existing Activities** and scroll to the bottom to select **Willo 1.3 Deep Link**:

Click **Continue in a new window**:

Click **Add Links (3)**:

## Course Management

Course Details   **Add Course Links**   Convert Course Links

### Add Course Links

Add the appropriate links below to give students access to their materials and support resources.

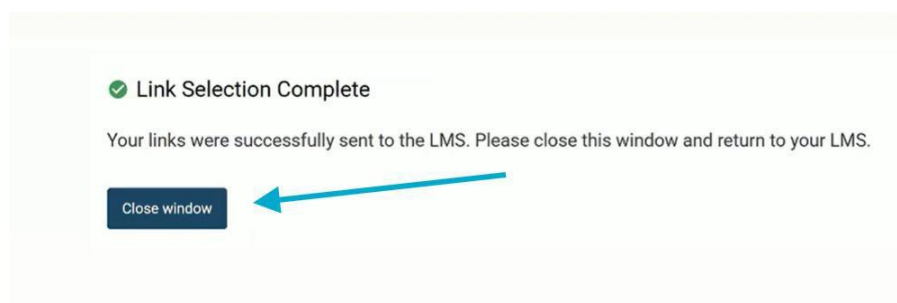

Course Links

Add a course support link to provide easy access to materials and assistance.

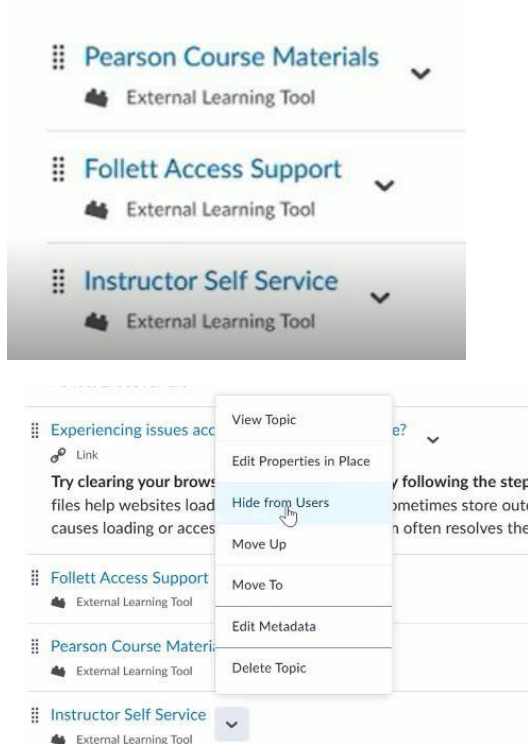

| <input checked="" type="checkbox"/> | Title                                           | Description                                                                                                                                                  |
|-------------------------------------|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | Follett Access Support <span>Recommended</span> | Include the Follett Access support link to your course so students can find and access support if they need it.                                              |
| <input checked="" type="checkbox"/> | Instructor Self Service                         | Gives Instructor access to self-service tools to manage their connection and accessing publisher platforms. Optional for instructors who want direct access. |
| <input checked="" type="checkbox"/> | Pearson Course Materials                        | Publisher Link                                                                                                                                               |

**Add Links (3)**

Click **Close window**:

You will see all three links in the Module – you may arrange them in any order you'd like and hide the Instructor Self Service link from students (Hide from Users):

Click on **Pearson Course Materials** to either create your MyLab | Mastering course OR if you've already created the course via the Access Pearson tool, click here to enable the Codeless experience for your students:
