## Reasons Why People Do Not Recycle

1

Recycling is inconvenient.

2

I do not have enough space in my home to recycle.

3

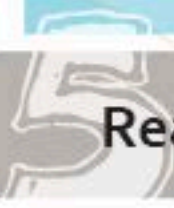

If they paid me, I'd recycle.

4

Recycling doesn't make a difference.

5

It is just too hard to do.

## Reasons Why People Should Recycle

Earth Day  
2013  
April 22nd

Recycling saves energy.

Recycling saves energy because the manufacturer doesn't have to produce something new from raw natural resources. Recycled materials save on energy consumption, which keeps production costs down.

1

Recycling reduces landfills.

Recycling reduces the need for more landfills. No one wants to live next to a landfill.

2

Recycling preserves resources & protects wildlife.

By recycling, we reduce the need to destroy habitats for animals. Paper recycling alone saves millions of trees.

3

Recycling is good for the economy.

Recycling and purchasing recycled products creates a greater demand for more recycled goods. Goods made from recycled materials use less water, create less pollution and use less energy.

4

Recycling helps our climate problems.

Recycling produces considerably less carbon, which reduces the amount of unhealthy greenhouse gas emissions.

Recycling Saves Trees

day

april 22

Recycling is good for the economy

Recycling reduces the need for landfills.

Recycling Helps Curb Global Warming

Recycling Protects Wildlife Habitat and Biodiversity

2013

Recycling reduces the use of toxic chemicals.

Recycling reduces water pollution.

Recycling creates jobs and promotes economic development.

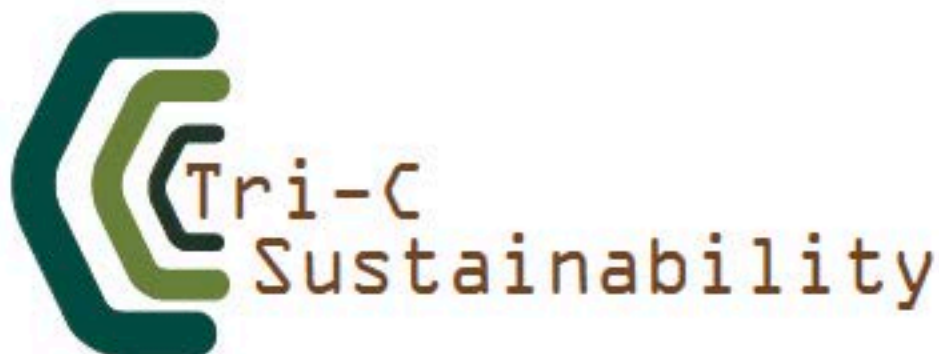

Recycling reduces the need for incinerators

make a difference . . . recycle!

## 5 Reasons

Why People Do Not Recycle

- Recycling is inconvenient.
- I do not have enough space in my home to recycle.
- If they paid me, I recycle.
- Recycling does not, make a difference.
- It is just to hard to do.
