## Cuyahoga Community College

Education at Cuyahoga Community College is a life-changing experience. More than 700,000 present and former students have been touched by the Tri-C experience. The College has enriched the lives and built solid futures for all who have enrolled, from the hopeful students who stood in line at the Brownell building 44 years ago to register for the College's first classes to today's students that register through the Web. The far-reaching effects of education at Tri-C have touched not only the individual students, but their families and the entire community.

The faculty, staff and administration at Cuyahoga Community College are dedicated to providing innovative and flexible services to students and the broader community as a whole. This commitment is expressed by developing a curriculum and delivering an academic experience that will produce students who are competitive within the job market, well-educated and informed. Whether these students are on the threshold of an exciting career, returning for new skills training or simply taking courses in a field of interest, the academic experience at Cuyahoga Community College meets their specialized needs.

## College Climate and Commitment to Diversity and Affirmative Action

In its acknowledgment of diversity, the College respects and welcomes differences among people, and carries out its mission mindful of the differences in its community. Through its overall climate, the College provides opportunities and reinforces understanding, appreciation and action intended to maximize the potential of all students. It is the intent of Tri-C that all terms of employment and educational benefits are administered without regard to race, color, religion, sex, national origin or ancestry, age, sexual orientation, disability or status as a disabled Vietnam-era veteran. Further, it is the College's intent to comply with appropriate federal and state laws, rules and regulations and to give special attention to increasing the participation of minorities, women, disabled persons and disabled or Vietnam-era veterans in all levels of the College. It is also the intent of the College to ensure that its environment is free from harassment or intimidation of any kind.

Inquiries concerning the College's affirmative action/equal opportunity procedure should be directed to: The Office of Affirmative Action/Diversity, Cuyahoga Community College, 700 Carnegie Avenue, Cleveland, OH 44115, 216-987-4772.

## History of Cuyahoga Community College, the Campuses and Corporate College® Sites

On Sept. 23, 1963, the largest first day enrollment for a community college in the nation's history took place at Cuyahoga Community College's first home, the 19th century Brownell School building in downtown Cleveland, which was leased from the Cleveland Board of Education. The initial enrollment was just over 3,000 students. Today, the College serves more than 55,000 credit and non-credit students each year.

Now one of the largest colleges in Ohio and the largest in Greater Cleveland, Tri-C has expanded to three modern campuses in downtown Cleveland, Parma and Highland Hills, as well as two Corporate College® sites in Westlake and Warrensville Heights. Other facilities include the District Administrative office in Cleveland and the Unified Technologies Center (UTC) adjacent to the Metropolitan Campus. The UTC is one of the largest technology training facilities in the country.

### Eastern Campus

The Eastern Campus in Highland Hills was founded in 1971, with permanent facilities being completed in 1981. Since its founding, the Eastern Campus has grown to encompass three buildings, each of which is designed to offer an environment conducive to lifelong learning. The campus features a comprehensive array of resources and amenities, beginning with state-of-the-art classrooms and laboratories. Students and faculty can also make use of a full-service library, 600-seat performing arts center, art gallery, massotherapy clinic, music studios, cafeteria and athletic facilities. In keeping with its mission of being "A Destination for Learning," the College facilities are open to every member of the community, young or old. The Eastern Campus is easily accessible from Interstates 271 and 480. Regional Transit Authority (RTA) buses also provide public transportation services.

### Metropolitan Campus

The Metropolitan (Metro) Campus, which first opened in 1969, is the College's first campus. Located near downtown Cleveland in the St. Vincent Quadrangle, the Metro Campus is easily accessible from Interstates 71, 77 and 90. Classes are offered during the day, evenings, on weekends and through distance learning.

The Metro Campus houses outstanding science, engineering and health career laboratories. Students learn first-hand in laboratories similar to those in the work environment. Laboratories exist for nursing, dental hygiene, computer science, office administration, health information management, manufacturing and the recording arts industry.

A state-of-the-art center for Health Careers and Nursing provides hands-on learning. Students learn with the use

of a Human Patient Simulator, a computer-driven mannequin, which mirrors the physical characteristics of a human and allows students to respond to critical care issues. A simulated hospital care unit with 22 beds allows students to study and test simulated patients.

Allied health laboratories also exist on campus for many other careers in the health care field including dental hygiene, health information management, surgical technician, emergency medical training and occupational and physical therapy. The Dental Hygiene Clinic also provides low cost preventive dental care to the community.

The Center for Arts and Culture presents the best in local, regional and international artists in the areas of music, dance, theater and performance art. Students also can mix music, record and stage musicians as part of the Recording Arts and Technology program. An auditorium seating more than 800 hosts numerous community programs, concerts and art venues.

The campus also features a commercial kitchen and full service campus restaurant. Students in the Hospitality Management program operate the restaurant, which serves breakfast and lunch during portions of the school year.

### **Western Campus**

The Western Campus opened in 1966 in the former Crile Veterans Hospital in Parma. A Veterans Memorial and Garden commemorate this history. The original facilities were replaced in 1975 with a modern six-building interconnected complex. At the center of the campus is the Galleria, a three-story glass-roofed mall surrounded by student service offices, the library and the cafeteria. Other facilities include the Advanced Automotive Technology Center, the Fire Tower, a Technology Learning Center, multiple computer labs, numerous labs for the sciences, health careers and technologies, an indoor pool, gymnasium, fitness center, outdoor track, tennis courts, athletic fields for soccer, softball and baseball, and a theater.

The Western Campus is easily reached from Interstates 71, 77 and 480. Buses also provide public transportation services. Lighted parking is available on outdoor lots adjacent to the campus buildings.

### **Workforce and Economic Development Division (WEDD)**

The Workforce and Economic Development Division (WEDD) at Cuyahoga Community College develops and delivers non-credit training and skills enhancement which serves industry, government organizations and the people who need to obtain either entry-level job skills, cross-training or upgrade training to obtain or retain a job.

## **Business and Professional Learning**

### **Center for Career Pathway Development**

The Center for Career Pathway Development serves students who are new job seekers, dislocated workers, displaced homemakers, low-wage incumbent workers and those in transition who are interested in fast-track training to secure employment for jobs that are in demand. Most new students qualify for full or partial financial aid through the Employment Connection partner network. Training is offered in the following areas: customer service, health care, manufacturing and private security. Courses take five to 13 weeks to complete. Upon completion, students receive a college certificate and are prepared to take certification or state licensure exams for most programs.

Key Career Place staff provides job readiness and life skill training, including resume writing, interviewing skills, networking and other job search methods, career planning, meeting employer expectations and managing life outside of work, budgeting, dealing with co-workers and supervisors, and adjusting to different business cultures. Job placement assistance is provided upon successful completion of training.

### **Literacy Services**

Literacy Services, a program of the Center for Career Pathway Development, provides teens 16 and over and adults pre-GED (General Education Diploma) developmental skills training, GED preparation and testing, basic skill remediation, assessment, workplace literacy training and career development. The program is designed for non-graduates from an accredited high school, graduates whose permanent records have been destroyed and émigrés who cannot provide a copy of high school records. GED preparation classes are offered at all three Tri-C campuses and the Unified Technologies Center. Literacy Services also offers civic instruction and adult English language skills courses through the program's Adult Basic Literacy Education (ABLE) program. The Literacy Services' GED Test Center offers both the Official Practice Test and the General Education Development test.

### **21<sup>st</sup> Century Teller Training**

In spite of ATMs and online banking, with more than 350 openings per year, bank teller positions are in more demand as financial institutions are looking for their branch offices to connect with customers with innovative products and services. The five-week, 70-hour college certificate program provides instruction in teller roles and responsibilities, customer service and communication, handling cash, checks and other transactions, daily balancing, security procedures, financial institution products, sales and cross-selling. The course includes targeting resume preparation and interviewing skills and the opportunity to meet with bank representatives. Successful bank tellers are energized in a customer-focused service-oriented work

environment, are proficient using computers and comfortable presenting bank products and services matched to customer needs. Tri-C's 21<sup>st</sup> Century Teller graduates have been hired by KeyBank, Dollar Bank, National City Bank, Ohio Savings Bank, Park View Federal Savings Bank and Charter One Bank.

### **Customer Service/Call Center Training**

With 566 openings each year, customer service representative is in the Top 10 of occupations with the most job openings in Northeast Ohio. Tri-C's Fast Track Customer Service Call Center certificate programs, in partnership with AT&T, provide nine-week and four-week intensive course options for technical and job-readiness skills essential for customer service representative and call center agent positions. Techniques for providing outstanding customer service and developing exceptional phone or face-to-face communications skills – active listening, determining customer needs, dealing with foreign accents, handling irate callers and creating customer satisfaction – are covered. Students complete Through the Customer's Eyes, a certification offered in partnership with Rockhurst University and endorsed by the International Customer Service Association. Tri-C offers the only area program taught in a modern simulated call center. Area companies who have hired graduates include Ohio Savings Bank, Marriott Global Reservations, Moen, Barnes Distribution, Kirby and Kaiser Permanente.

### **Police/Fire Academies**

The Law Enforcement and Fire Academies at Cuyahoga Community College's Public Safety Institute offer the opportunity for police, fire and law enforcement students to learn the skills and teamwork necessary to be prepared when called upon for duty.

The Academies provide state certified training for police officers, fire fighters, security officers, corrections officers and bailiff personnel, as well as advanced training in law enforcement and fire. Hands-on training is given by experienced instructors.

### **Manufacturing and Applied Technology**

The Manufacturing and Applied Technology Division provides students with affordable, high-quality training leading to portable skill credentials. The Division offers credit, non-credit, certificate and customized programs in manufacturing foundation skills, manufacturing technologies, applied industrial maintenance, pre-apprenticeship and apprenticeship training.

At the downtown UTC facility, the shop floor spans more than 12,000 square feet of completely renovated space that supports the latest equipment which regional manufacturers either currently use or will use in the future. It is the largest industrial maintenance training center in Northeast Ohio and was recently upgraded with a \$1.5 million grant from the Department of Labor.

Standard programs include: Precision Machining, CNC machining, Industrial/Equipment Maintenance, Tool and Die Apprentice, Industrial Welding, Blueprint Reading, Shop Math, Computer-Aided Design (CAD), Quality Control, and Electronics Assembly. In addition to the standard programs, customized Job Skill Training is available.

Through consultation with an Industry Advisory Board, the standard and customized training programs provide participants with marketable skills that are "filling the talent pipeline" for Northeast Ohio manufacturers.

All programs meet the specifications and standards of the Department of Labor.

### **Corporate College®**

Corporate College® West (Westlake) and East (Warrensville Heights) are designed to be the model for providing new solutions and opportunities to individuals, businesses and industry to exceed in today's knowledge-based, high-tech economy.

Corporate College® is the primary vehicle for delivering Cuyahoga Community College's non-credit training services to area employers and their workers. The concept includes a strategic initiative focused on professional development and training programs that are designed to meet employers' demands for a talented workforce. Corporate College® also offers credit and non-credit training and skills enhancement courses for the individual.

### **Center for Health Industry Solutions**

The Center for Health Industry Solutions provides training tailored to meet the needs of the health care industry and its current and future employees. The Center focuses on critical health care employment shortages and provides a wide selection of courses that includes entry-level, continuing education and certification programs.

The Center for Health Industry Solutions, established in partnership with the Mt. Sinai Health Care Foundation, works closely with representatives of the health care industry to develop accelerated training and education programs that respond quickly to critical workforce needs.

Training for nurses, nurse assistants, patient access specialists, veterinary technicians, opticians, dental auxiliaries and medical office personnel including billers and coders, among others, is delivered through a variety of offerings and locations. The purpose of all programming is to provide career preparation and skills needed now.

## Center for Technology Solutions Information Technology

As the demand for qualified Information Technology (IT) workers continues to grow, the information technology training group is prepared to meet the challenge by providing tailored, timely training solutions at affordable prices in all areas of the IT career fields.

We have programs and courses for each stage of your IT career. Thirty certification programs and hundreds of courses through partnerships with Microsoft, Oracle, CISCO, Sun and more are offered.

IT training is provided at convenient day, evening and weekend schedules, and customized courses and curriculum are available at our locations or at an employer's site.

Our locations feature training facilities complete with high speed Internet access, high-performance workstations and modern amenities. Education partnerships with the leading IT industry giants, coupled with the professional experience and technical credentials of our certified instructors, make this the perfect training option to sharpen your competitive edge.

An authorized Certiport Testing Center (for Microsoft Office Specialist exams) is located at Corporate College West.

## Assessment Center

The Center for Assessment assists your human resources (HR) department with recruitment, pre-hire and performance assessments, and HR consulting. Employee assessments are valuable tools that help you match an individual's talents and strengths to job-related characteristics of specific jobs.

In addition, we provide customized, pre-employment testing. The Center offers employee selection testing for over 65 occupations and 12,000 jobs. Assessment areas include basic skills, job readiness, technical skills, customer service skills and computer skills for industries such as Legal, Financial Services, Retail, Health Care, Hospitality and Manufacturing.

## Institute for Organizational Excellence

The Institute for Organizational Excellence offers a one-stop shopping experience for upgrading skills, continuing education and quality management implementation and training. The Institute has assisted over 75 Northeast Ohio companies with ISO 9000, ISO 14001 and TS 10649 certification. Training course topics include customer service, leadership, team building, time-management, writing and communications, finance and payroll and management training.

Business planning courses provide strategic planning, administrative professional skills, diversity awareness and human resources training.

Standardized training programs from Franklin Covey and Motorola University are also available.

Partnerships with the American Society for Quality and the Cleveland Engineering Society allow for comprehensive refresher courses for professional certification.

The Center also helps companies develop plans to reach their quality goals by providing cost-effective training and consulting services.

The Center is a leader in quality system training and consulting. Since the late 1990s, the Center has been training and consulting with organizations to help them achieve quality and environmental goals. Our programs deliver the right knowledge, skill and motivation to make a difference.

The Quality Center offers assistance to allow for in-depth coverage of topics specific to your business or industry. Training programs can include overview and understanding of management systems; components, concepts and implementation; integrating and maintaining the system; system documentation; and internal and lead auditor training.

We pride ourselves on consistent and reliable service, and creative solutions for our customers' needs. You can learn how to fulfill the requirements of such standards as ISO 14001, ISO 9001:2000, and ISO/TS 16949:2002.

Courses focus on how to implement these systems and gain a working understanding of corrective action, the audit process, documentation preparation and other key methodologies.

## Key Career Place

Key Career Place provides resources, services and training to link students, graduates and community job seekers with the businesses who want to hire them. Services to employers include job and internship postings to Tri-C's online job board with links to the company Web site, on-campus recruitment tables and information sessions, and job and internship fairs that attract hundreds of qualified students, graduates, and community job seekers.

## Key Entrepreneur Development Center

Owning a small business can be an exhilarating, enriching experience. It can also be lonely, scary and confusing. The Entrepreneur Development Center at Corporate College® is here to help you avoid the pitfalls of business ownership and improve your chances for success.

We offer programs and services for small businesses. We work with start-up and established businesses, providing the information you need to take your business to the next level, whether that's from an idea to a written plan or from an existing business to a growing business.

We have online and instructor-led classes so you can get

## General Information

---

the information you need, when you need it, the way you want it. Our classes are taught by experienced entrepreneurs so they know what you are facing. We also have one-on-one coaching for business owners who need specific help to grow their businesses.

### Online Courses

No matter where you are in your lifelong learning journey, what your educational goals may be or your location, you can take advantage of the self-paced, Web-based online courses.

Participants go through orientation, meet with instructors, conduct research and complete assignments – all online. Classes usually require four hours each week for six weeks, but students may choose to work at their own speed – working ahead or catching up as needed. Classes are offered in business administration/management, computers, entrepreneurship, health care, Web design/development, test preparation, writing and personal enrichment.

Participants often add traditional, instructor-led classes to the mix for a customized, complete learning experience.

### Safety/Security

The Safety/Security Division offers a variety of programs, courses and certifications designed to provide the tools needed to help you reduce risk and provide protection to critical resources.

Offerings range from half-day information sessions that heighten awareness to intense certification programs in Information Security, Computer Forensics and Environmental Safety to name a few. Courses on Risk and vulnerability assessments and table top exercise design are also offered, as well as “turn key” exercises for various risks and threats.

### Accreditation and Institutional Memberships

Cuyahoga Community College holds institutional memberships in numerous national educational, professional and accrediting organizations. The College is accredited by the Higher Learning Commission, a commission of the North Central Association of Colleges and Schools. In addition, a number of the College’s career programs are approved or accredited by appropriate specialized associations or agencies. Some of these are:

Accreditation Board for Engineering and Technology (ABET)

Accreditation Council for Occupational Therapy Education

Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)

### **Northeast Ohio Commission on Higher Education (NOCHE)**

Cuyahoga Community College is a member of the Northeast Ohio Commission on Higher Education. This is an organization of 22 Northeast Ohio colleges and universities that represents a partnership among these institutions of higher education and the business and industrial community.

Established in 1951, the Commission works to address the common needs and problems of higher education in Northeast Ohio.

## NOTES
