

# PLACEMENT TESTING DECISION TREE

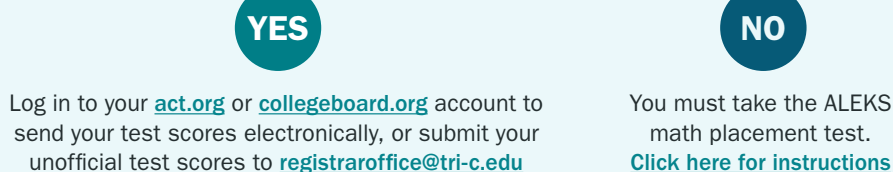

## English Testing

English and math placement is required for new students and determines which courses you can register for. If English is not your first language, or if you have taken English as a Second Language (ESL) coursework during high school, you must complete the [ESL placement test](#) before you take the English or math placement tests. Students may be exempt from placement testing. Use the chart below to determine if testing is required.

## Math Testing

**Do you have qualifying ACT (21+) or SAT (520+) math scores from the past two years?**

**Note:** Placement testing for College Credit Plus students may be different.
