

ART-1010

Art Appreciation

Course Description

This course provides a stylistic and historical overview of visual culture from inception to the 21st century, including an introduction to the nature, vocabulary, media, and history of art as well as an examination of art's themes and purposes, visual elements, and principles of design.

Interested in the World of Art?

Explore and compare the properties, characteristics, and processes of various art media. This includes 2-D forms such as drawing, painting, printmaking, and photography; 3-D forms like sculpture, architecture, and craft; alternative media such as conceptual art, performance, installations, and earthworks; and digital media, including visual design, film, video, and digital art.

Why Take this Course?

Embark on a journey through time and place as you study works of art and culture from prehistory to the contemporary period. Learn how art history reflects culture, economies, geographies, and the movement of people and ideas. Acquire the skills necessary to interpret works of art explain how past events and objects from early western art relate to today's society.

Learn ways to critically evaluate and analyze the formal visual elements and principles of design in various works of art and architecture. Organized thematically, the focus of this class will be to explore the ways in which art has addressed various aspects of the human condition throughout cultural history.
