

Maria Morris

I'm from Mexico, Mexico City. The family and traditions are so important there. I am from a place where the kids can wear, dresses, jeans, shorts, with their favorite cartoons or music on front of the t-shirt. Always we can see people walking outside, or in the way to school. The friendship is so wonderful, because is like another member or your family, shearing everything with them.

Another subject is the kitchen always is a fun adventure, because all the family can cook together and everybody can learn the secrets about cook, and in the same time enjoy the experience be side of grandma, and they said every meal need be cook with your heart and your love. We don't need excuse for be together and enjoy the family.

I want speak good English, and communicate with more people, and to continue with my studies. I want to study Human Resources, I miss work in the office. But in the last time year cross my mind work in the medical area, maybe something like nursing or Assisting Medical. My next goal is finding a part-time job and spend time with my kids.
