

My Story

By Inna Blyzniuk

I will tell you my story about where I'm from, and where I'm going. I was born in Ukraine, in a small village. I went to school, had a happy childhood with its joys and sorrows. There I graduated from school and medical college. In 2019, my family decided to move to the United States. Nobody knew what awaited us and whether it was worth changing the place of residence, but by some miracle, because of what happened to our documents, you can't call otherwise. In a short time, we moved to the USA. So, a new life began, everything had to start from scratch. First, it is another language and another culture. Second, it is a different climate and time zone. In the first days I got a lot of stress, but at the same time it was interesting and a little scary. But, you get used to everything, and now time has passed and everything is fine. When I lived here for two and half years I understand that it was the right decision, because during this time I learned a lot that will help me go through different experiences in my life. I have great hope and faith that together we will defeat evil with good, because, our future depends on the present. In conclusion, we will try to fill our present with useful things, so that our future and the future of our world will be bright and peaceful.
