## Pre-Reading Opinion Questionnaire

I recommend using this pre-reading questionnaire as a conversation starter and to pique the students' interest in the book. The results can remain private, you don't need to see them.

You may also have students save the questionnaire or you could save it for them so they can fill the same one out again after reading the book and or reading about/discussing these topics from the book in order to see if their attitudes have been altered. They could then write about any changes that did happen or why they didn't as a final in-class writing if you were so inclined.
