## Math Multiple Measures Placement

Instructions for placing students using multiple measures are given below. Multiple measures include ALEKS placement scores and high school measures (GPA, course grades and ACT/SAT scores).

- Current high school students in grades 10-12, or those who have graduated high school within the last 5 years, should be placed using their high school GPA and coursework (Table 1) or ACT/SAT scores (Table 2), whichever places them into the highest level course needed for their degree or program.
- To use Table 1, locate the intersection of the student's high school GPA and course grade. Use the highest level course completed within the past 5 years. Students must meet the high school GPA and coursework criteria for placement.

## GPA Guidelines

- Students must have a weighted or unweighted GPA of 2.5 or greater to be placed using Table 1.
- If a student has a weighted and unweighted GPA, use the higher GPA.

## Coursework Guidelines

- Use completed courses only for which a student has earned a total of at least 1 credit. It may be necessary to look at previous years or semesters to determine the total number of credits earned.
- If there is more than one grade for a course, use the most recent grade.
- Courses with grades of P cannot be used for placement.
- Completion of English 0995 or English 1010 eligibility is required for placement into Math $1410+0970$.
- Students who have not yet earned full credit for a course should be encouraged to resubmit their transcripts to the college once they have earned 1 credit.
- Students who cannot be placed using Table 1 or ACT/SAT scores must take a proctored ALEKS placement test. This includes CCP students in grades 7-9. In addition, if a student isn't placed into a college-level math class using Table 1 or their ACT/SAT scores, they should be encouraged to take the ALEKS placement test. Unproctored ALEKS test scores cannot be used for placement beyond the Summer 2022 semester.
- In Table 2, students may take any course listed on their placement row or any row above it.
- Please contact an associate dean in the College of Liberal Arts and Sciences if you have further questions regarding placement.

## Courses

| Math 0915 | Basic Arithmetic and Prealgebra |
| :--- | :--- |
| Math 0930 | Essential Skills for Algebraic and Quantitative Reasoning (Corequisite for Math 1190) |
| Math 0955 | Beginning Algebra |
| Math 0965 | Intermediate Algebra |
| Math 0970 | Essential Skills for Probability and Statistics (Corequisite for Math 1410) |
| Math 1190 | Quantitative Reasoning |
| Math 1370 | Mathematics for Elementary and Middle School Teachers I |
| Math 1380 | Mathematics for Elementary and Middle School Teachers II |
| Math 1410 | Elementary Probability and Statistics I |
| Math 1420 | Elementary Probability and Statistics II |
| Math 1470 | Modern Mathematics for Business and Social Science I (Business Algebra) |
| Math 1480 | Modern Mathematics for Business and Social Science II (Business Calculus) |
| Math 1490 | Business Probability and Statistics I |
| Math 1500 | Business Probability and Statistics II |
| Math 1530 | College Algebra |
| Math 153H | Honors College Algebra |
| Math 1540 | Triogonometry |
| Math 154H | Honors Trigonometry |
| Math 1580 | Precalculus |
| Math 1610 | Calculus I |
| Math 161H | Honors Calculus I |
| Math 1620 | Calculus II |
| Math 162H | Honors Calculus II |
| Math 2000 | Introduction to Discrete Mathematics |
| Math 2310 | Calculus III |
| Math 231H | Honors Calculus III |
| Math 2410 | Introduction to Linear Algebra |
| Math 2520 | Differential Equations |
