

Bob Beesley
Vice President, Quality and Engineering
Oatey Co.

With more than 25 years of experience in manufacturing, Bob Beesley is an expert leader of engineering and operations functions across a range of industries. After beginning his career at Delphi Automotive Systems in plastic injection molding technology, he moved to Design Molded Plastics in Macedonia, Ohio, where he provided plastic part solutions to Northeast Ohio manufacturers for more than 15 years.

In 2016, Beesley joined Oatey Co., a market-leading provider of products for the residential and commercial plumbing industries, to lead its Cleveland manufacturing operations. Today, as Oatey's vice president of quality and engineering, he helps continue the company's 100-year heritage of trusted, reliable, high-quality products.

Through his passion for manufacturing excellence, Beesley has integrated himself into the Cleveland community, including serving as a founding member of the Manufacturing Sector Partnership supporting Cuyahoga County's workforce development efforts. He is also a member of the organization's Manufacturing Leadership Team.
