

Essential Learning Outcomes (ELOs) Report for AY 2015-2016

I. Background

In Fall 2014, the Committee on Learning Outcomes Assessment (CLOA) was formed, and in close partnership with the Office of Curriculum Development and Learning Outcomes Assessment, kick-started previously stalled efforts on General Education Outcomes (GEOs), now revised to Essential Learning Outcomes (ELOs) assessment.

General Education Outcomes (GEOs) Collection and Assessment

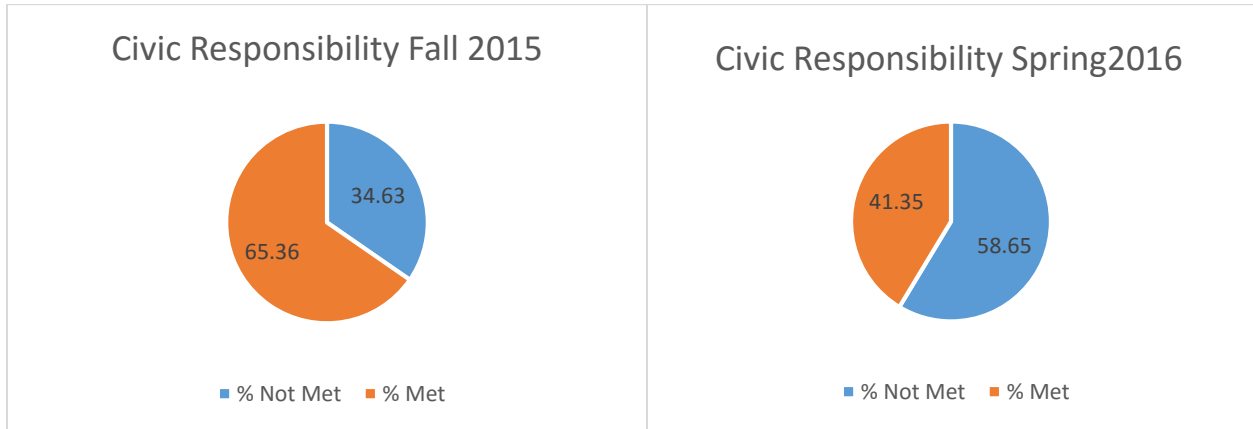

1. Facilitated the collection of GEO artifacts through faculty-to-faculty outreach.
 - o Engaged 109 faculty members in the collection of Gen Ed artifacts, 61 in Fall 2015 and 48 in Spring 2016
 - o 1352 GEO artifacts were collected in fall and 684 in spring
2. Assessed 542 GEO artifacts through a juried assessment process conducted by CLOA members. 248 were assessed from Fall 2015 and 322 were assessed from Spring 2016
3. Continued to use the new GEO artifact collection process within Tk20 using course assignments that resulted in a decrease of time required of faculty
4. Continued to use the new juried assessment process within Tk20 for GEO artifact assessment that resulted in geographically dispersed jury conducting blind assessments rather than assessment days and faculty panels. Since the TK20 system will no longer be used starting in the fall of 2016, the CLOA faculty continued to serve as the primary assessors of student work.

General Education Revisions

1. The process committee continued the work on the revision of the General Education Outcomes, rubrics, and guides.
2. After extensive research, the committee recommended changing the name from "General Education Outcomes" to "Essential Learning Outcomes" to align our nomenclature with that of the AACU.
3. The Global Awareness outcomes was eliminated and aspects of the outcome were incorporated into both the Civic Responsibility and Cultural Sensitivity outcomes.
4. Quantitative Reasoning was added as an Essential Learning Outcome.

5. All outcomes, rubrics and guides were revised and reviewed by the CLOA committee. The materials were also tested for usability against existing artifacts.
6. Input was gathered via SurveyMonkey from all stakeholders including faculty (full-time and part-time), external advisory committee members, and program managers. Student focus groups were also held on each campus in order to gather student input.

II. Essential Learning Outcomes (ELO) Assessment Results
